

AMENDMENTS TO THE CLAIMS

A 1. (Currently Amended) An information processing device having television display function and provided with a small display device in addition to a display device for the information processing device, wherein, when a power supply is turned ON, a TV picture is displayed on the display device and TV sound is output, an operating state and a starting state of the information processing device is displayed on the small display device, wherein the information processing device determines whether an information processing function or a television function is to be performed and providing a source of data to be displayed on the small display device based on the determination.

2. (Currently Amended) An information processing device having a TV display function and provided with a small display device in addition to a display device for information processing device, wherein a currently selected TV channel number and TV channel information is displayed on the small display device, wherein the information processing device determines whether an information processing function or a television function is to be

performed and providing a source of data to be displayed on the small display device based on the determination.

A 3. (Currently Amended) An information processing device having a TV display function and provided with a small display device in addition to a display device for the information processing device, which possesses a function of handling plural input sources for TV output and a function of displaying information of a currently selected input source out of the plural input sources, on the small display device, wherein the information processing device determines whether an information processing function or a television function is to be performed and providing a source of data to be displayed on the small display device based on the determination.

4. (Currently Amended) An information processing device having a TV display function and provided with a small display device in addition to a display device for the information processing device, wherein TV sound volume information is displayed on the small display device, wherein the information processing device determines whether an information processing function or a television function is to be performed and providing a source of

data to be displayed on the small display device based on the determination.

A' 5. (Currently Amended) An information processing device having a TV display function and provided with a small display device in addition to a display device for the information processing device, which is further provided with function for selecting a content of information to be displayed on the small display device, wherein an operating state and a starting state of the information processing device, a currently selected TV channel number and TV channel information, a currently selected input source and TV sound volume information are selectively displayed on the small display device, wherein the information processing device determines whether an information processing function or a television function is to be performed and providing a source of data to be displayed on the small display device based on the determination.

6. (New) An information processing device having television display function comprising:

an information processing module and a television module, wherein,

A' when a power supply is turned ON, whether an information processing function or a television function is to be performed is determined and TV picture is displayed on the display device and an operating state and a starting state of the information processing device is displayed based on the determination.
